PROFESSIONAL SUMMARY

Operations-focused professional with **6+ years** of experience: three and a half years in general affairs, asset, and vendor operations at a 400-employee hotel, and nearly three years in customer support at a global game company. Experienced in **inventory and asset management**, stock control, reverse logistics, and supplier coordination, with a record of preventing missing items and duplicate purchases through accurate record-keeping. Comfortable handling confidential information, standardizing recurring tasks through documentation, and meeting deadlines in a fast-paced environment. Communicates fluently in **Korean and English** and is expanding an IT and cloud foundation through AWS certifications.

KEY ACHIEVEMENTS

- 400** Employees supported across office asset, supply, and rental-device operations, including inbound, issue, replacement, return, and reverse logistics.
- 90%** Vendor service-level target set in a performance-based agreement — fees held flat until the rate was sustained for 3 months, controlling cost while protecting service quality.
- US HQ** Recurring refund exceptions documented with data and turned into an official standard procedure approved by overseas headquarters.
- 74% → 83%** Team customer-satisfaction (CSAT) improvement while handling high-volume cases on deadline at Blizzard Entertainment.

PROFESSIONAL EXPERIENCE

General Affairs (GA) · Asset & Vendor Operations

Feb 2022 – Jul 2025

Josun Hotels & Resorts

Seoul, South Korea

- Managed office assets, supplies, and rental devices for a **400-employee** operation — tracking inbound, issue, replacement, return, and reverse logistics, and maintaining accurate records to prevent missing items, delays, and **duplicate purchases**.
- Acted as the link between internal departments and external suppliers: coordinated supplies, rental devices, facilities, and outsourced services, verified vendor billing and delivery against orders and contracts, and supported contract documentation and internal approval procedures.
- Turned a vendor's fee-increase demand into a performance-based agreement built on call data both sides trusted: fees stayed flat until the vendor sustained a **90% response rate** for 3 months, then rose 2.5% only after that proof.
- Created and updated operational **checklists and SOPs** to standardize recurring tasks, improving handover accuracy and following up on open requests until completion.
- Handled confidential employee, vendor, and administrative information with accuracy and discretion under strict confidentiality requirements.

Customer Support / Operations

May 2019 – Dec 2021

Blizzard Entertainment

Seoul, South Korea

- Resolved a high volume of cases (accounts, refunds, bugs, and incidents) on deadline using internal tools and English logs, helping raise team CSAT from **74% to 83%** and earning Employee of the Month.
- Identified a recurring exception — payments on the wrong account that missed the 7-day refund window — **documented every recurrence with data**, and won team and US HQ approval to adopt it into the standard refund procedure.
- Documented recurring issues and produced self-service content, including **60+ Korean player guides** on Wowhead, sharing only externally verified information and nothing internal or confidential.

PROJECTS

Applied AI Program — Hands-on IT & Cloud Projects

2025 – 2026

Intel AI for Future Workforce · team and solo projects

- Built **WalkMate**, an AI walking-guidance prototype, as team lead — connecting an app, AI detection, backend, and an operator dashboard for quality review (React, FastAPI, Supabase, AWS S3).
- Designed the core logic for **DeToks**, an LLM cost-optimization CLI, defining when saved results can safely be reused and collecting the edge cases where reuse would fail — a process-rules and exception-handling exercise.
- Strengthened comfort with **cloud and IT systems**, technical documentation, and data-driven problem solving, reinforced by AWS Cloud Practitioner and AI Practitioner certifications.

SKILLS

Operations & Logistics	Inventory & asset management, stock control, reverse logistics, internal request handling, vendor coordination, documentation & SOP updates
Tools & Data	Microsoft Excel, Word, PowerPoint, Outlook, data tracking & reporting, ticket / workflow systems
Process & Communication	Process standardization, confidential information handling, cross-functional coordination, stakeholder follow-up, Kaizen / continuous-improvement mindset
Languages	Korean (native), English (business fluent: TOEIC 980, OPIc AL)

EDUCATION & CERTIFICATIONS

2025 – 2026	Intel AI for Future Workforce, Applied AI Program — Outstanding Graduate Award
2013 – 2019	B.A. in Public Administration, Hankuk University of Foreign Studies
Certifications	AWS Certified Cloud Practitioner · AWS Certified AI Practitioner · Computer Specialist in Spreadsheet & Database Level 1
